

Vari-DEC

Vari-Dec is a unique concept in wetfloor technology offering complete flexibility to design a linear wetroom of almost any configuration.

Versatility is the key to the system, offering a choice of drain position with up to three traps, combined with a range of pre-formed graded boards and stylish grill finishes, all available from stock.

Once on-site, Vari-Dec is fully trimable making it quick and simple to install, with the flexibility to overcome any unforeseen obstacles.

Each system comprises of three main components: a **Drainage Component**, a range of **Graded Boards** and a choice of either a **Floor or Wall Grill**. Infill panels and tile trims are also available for certain configurations.

- 1 Select the required number of Drainage Components.
- 2 Select the required number of Graded Boards.
- 3 Select the appropriate Floor or Wall Grill, along with the correct number of traps depending on the required flow rate.

GRILL POSITION

Floor Grill

For installation in either an offset or central position within the shower area. Grill width 58mm.

Wall Grill

For installation against the wall. Grill width 86mm.

To create a one way fall, select the Wall Grill option
